Types of Principal Diagnoses 2004

California

Pregnancies/births account for 28.6% of hospital discharges from facilities in California.

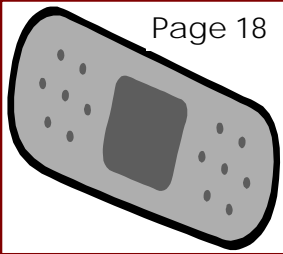

Circulatory and digestive system disorders and symptoms/other reasons account for the top three diagnostic categories excluding pregnancies and births.

Types of Principal Procedures 2004

Obstetrical procedures account for 21.6% of hospital inpatient principal procedures performed in California facilities.

Principal procedures performed for diagnostic/therapeutic, digestive, and cardiovascular systems are the top three procedure categories for hospital discharges from California facilities, excluding obstetrical procedures.

Mono County

Hospitalization Characteristics

CLINICAL OVERVIEW

Types of Injuries 2004

Types of Injuries by Age 2004

California

Adverse effects of medications, accidental falls, and misadventures /complications are the top three principal causes of injuries at California facilities.

In California facilities, patients age 60+ represent 69.6% of discharge records for accidental falls and 64.6% of discharge records for adverse effects of medications.

Footnotes:

Per Adjusted Day: This statistic adjusts the number of patient days to compensate for outpatient services.

The financial data on this page reflect disproportionate share payments transferred to a related public entity.

Note that columns may not add to subtotals due to rounding.
